

IN THE SPECIFICATION

Please amend the specification by replacing the paragraph below with the amended paragraph as shown below:

On page 18 of the Substitute Specification, please replace paragraph 0046 as follows:

Referring now to FIG. 4, in another aspect of the present invention, a bur 400 with a depth guide 402 is then utilized to prepare the osteotomy within the outline of the window 808 inside the surgical guide 800. As shown in the drawing, the bur 400 includes an elongated shaft 404 having a cutting blade 406 affixed to an end of the shaft 404, as is well known in the art. The depth guide 402 is affixed traversely transversely across the shaft at a distance of 10 mm from the endpoint (E) of the cutting blade 406, although such distance is not considered limiting.
